

## Issue Tracker Guide for the CFMS Website

*Notice a problem with the website? Have a recommendation? Please follow the steps below to submit a ticket! This system helps us follow-up with concerns, and keep track of the changes that have been made!*

### Submitting a Ticket

***\*\*Important Note\*\* if you notice something wrong with the website related to security (login, passwords, accessing certain areas, etc.) please do not post that information on the tracker, instead email [it@cfms.org](mailto:it@cfms.org) as soon as possible. Thank you.***

1. Navigate to <https://github.com/cfms-website/cfms-website.github.io/issues> to access the CFMS Website Issue Tracker, or click on the “**Submit a Ticket**” button on the CFMS Website

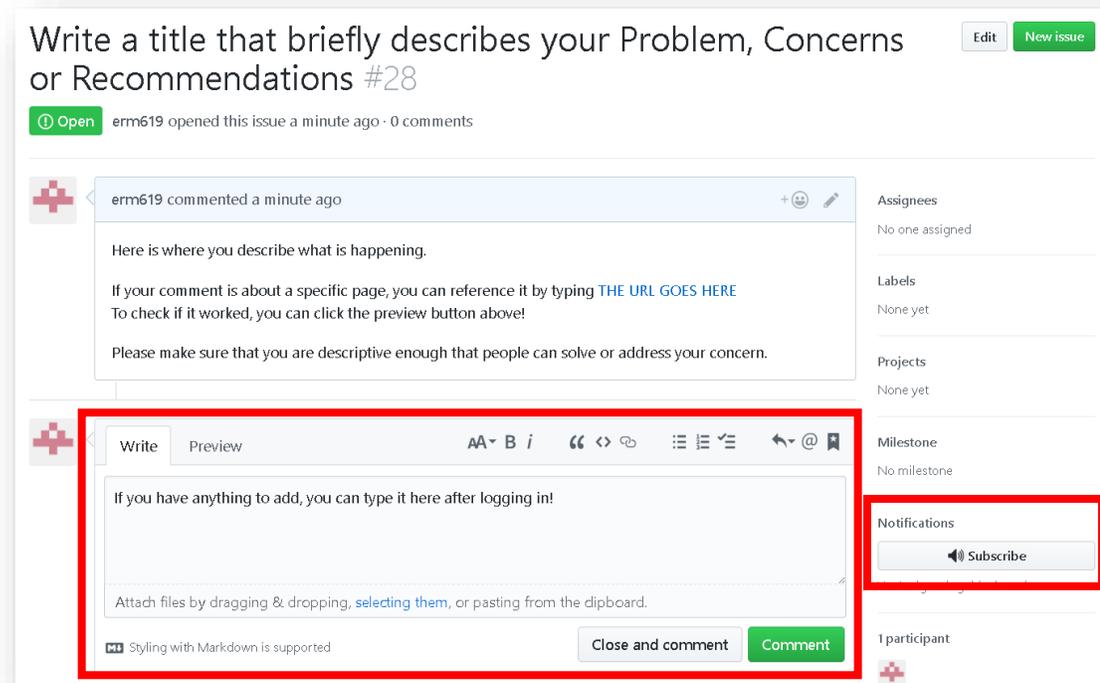

2. Scroll through the current list of Tickets, to see if someone has already noticed the same concern as you and created a ticket.

If you find a ticket that matches your concern – go to step 3.

If you do not find a ticket that matches your concern - go to step 4.

*Note: you can click on the various Tickets to see a more detailed description, to make sure that it matches yours.*

3. **Someone noticed the same issues** – you can either:
- stop here, **or**
  - create an account/login to add an extra comment (*in the textbox below the issue*)  
or to follow the issue to get notified when it gets resolved or commented on (*make sure you click the “Subscribe” button*)

The screenshot shows a GitHub issue page. At the top, there is a text input field for the issue title: "Write a title that briefly describes your Problem, Concerns or Recommendations #28". To the right of this field are "Edit" and "New issue" buttons. Below the title, a green "Open" button is followed by the text "erm619 opened this issue a minute ago · 0 comments".

The main content area shows a comment from user "erm619" made "a minute ago". The comment text reads: "Here is where you describe what is happening. If your comment is about a specific page, you can reference it by typing THE URL GOES HERE To check if it worked, you can click the preview button above! Please make sure that you are descriptive enough that people can solve or address your concern." To the right of the comment are sections for "Assignees" (No one assigned), "Labels" (None yet), "Projects" (None yet), and "Milestone" (No milestone).

Below the comment is a "Write" form, which is highlighted with a red border. It has a "Write" tab and a "Preview" tab. The form contains a text area with the placeholder text: "If you have anything to add, you can type it here after logging in!". Below the text area is a dashed line and the text: "Attach files by dragging & dropping, selecting them, or pasting from the clipboard." At the bottom of the form are two buttons: "Close and comment" and "Comment".

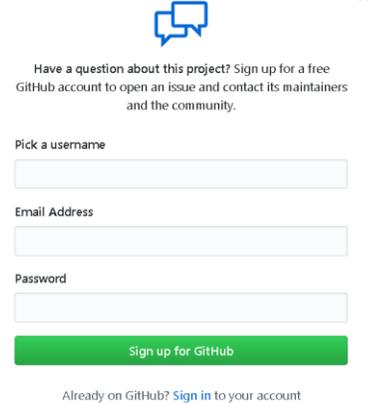

To the right of the "Write" form is a "Notifications" section, also highlighted with a red border. It contains a "Subscribe" button with a bell icon.

At the bottom right of the page, it says "1 participant" with a small profile icon.

4. **You are the first to notice an issue** – To post a ticket, you will need to create an account with GitHub and will be prompted to do so when you click

“**New Issue**” (step 5)

*Note: this will allow you to post a new ticket, be alerted when it gets dealt with, allows us to follow-up if we have question, and ensures that your concerns are being heard! It is free, and all you need is an username, email address and password!*

Have a question about this project? Sign up for a free GitHub account to open an issue and contact its maintainers and the community.

5. At the top, click the green “**New Issue**” button

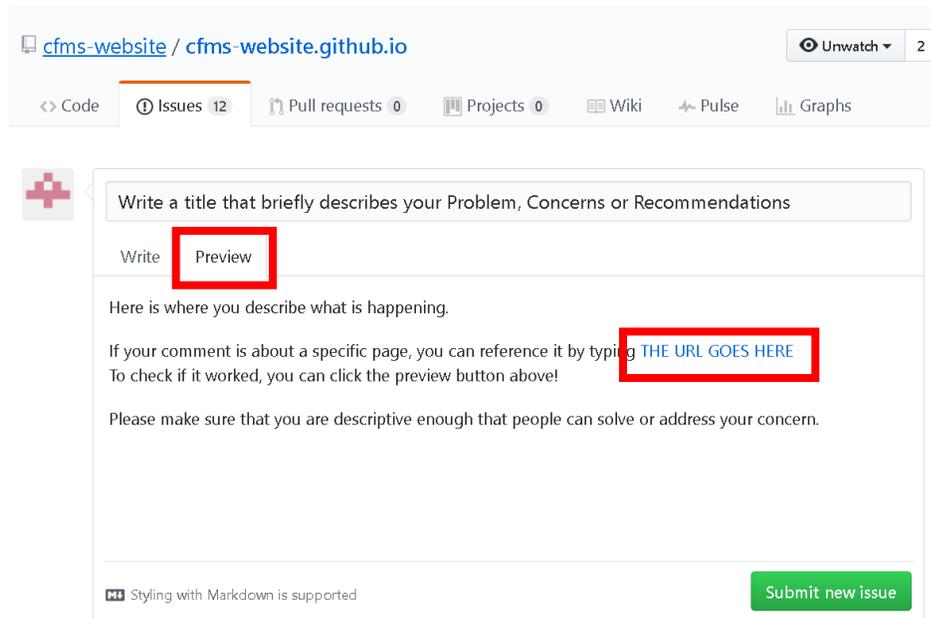

6. Enter the information about the ticket that you are entering. Make sure that the title is descriptive enough that someone scrolling through the tickets can understand what the problem is. In the textbox, you can be more descriptive about why you are submitting a ticket.

7. To help us find what you are referencing, it is helpful if you can include a URL. To do so, click the URL button at the top bar and then enter the URL between the two square brackets

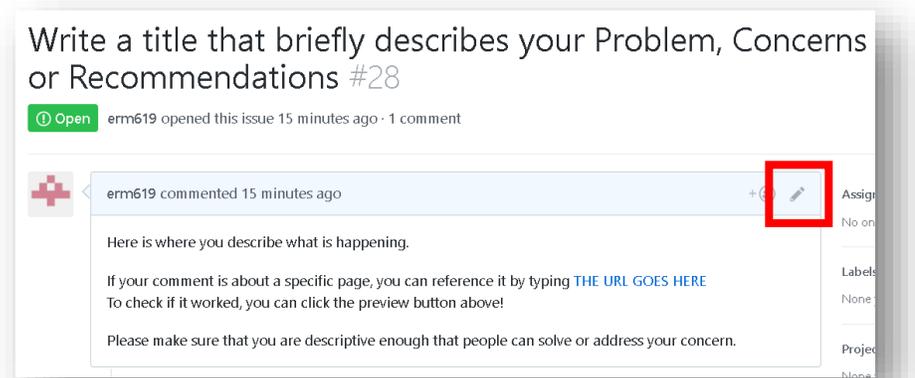

8. To check that your URL worked, click the **“Preview”** button, and it should look like the example below

The screenshot shows the GitHub issue creation interface for the repository 'cfms-website / cfms-website.github.io'. At the top, there are navigation tabs for Code, Issues (12), Pull requests (0), Projects (0), Wiki, Pulse, and Graphs. The main form has a title input field with the placeholder text 'Write a title that briefly describes your Problem, Concerns or Recommendations'. Below the title field are two buttons: 'Write' and 'Preview', with the 'Preview' button highlighted by a red box. The body of the issue contains the following text: 'Here is where you describe what is happening.', 'If your comment is about a specific page, you can reference it by typing [THE URL GOES HERE](#). To check if it worked, you can click the preview button above!', and 'Please make sure that you are descriptive enough that people can solve or address your concern.'. At the bottom right of the form is a green 'Submit new issue' button. A small note at the bottom left states 'Styling with Markdown is supported'.

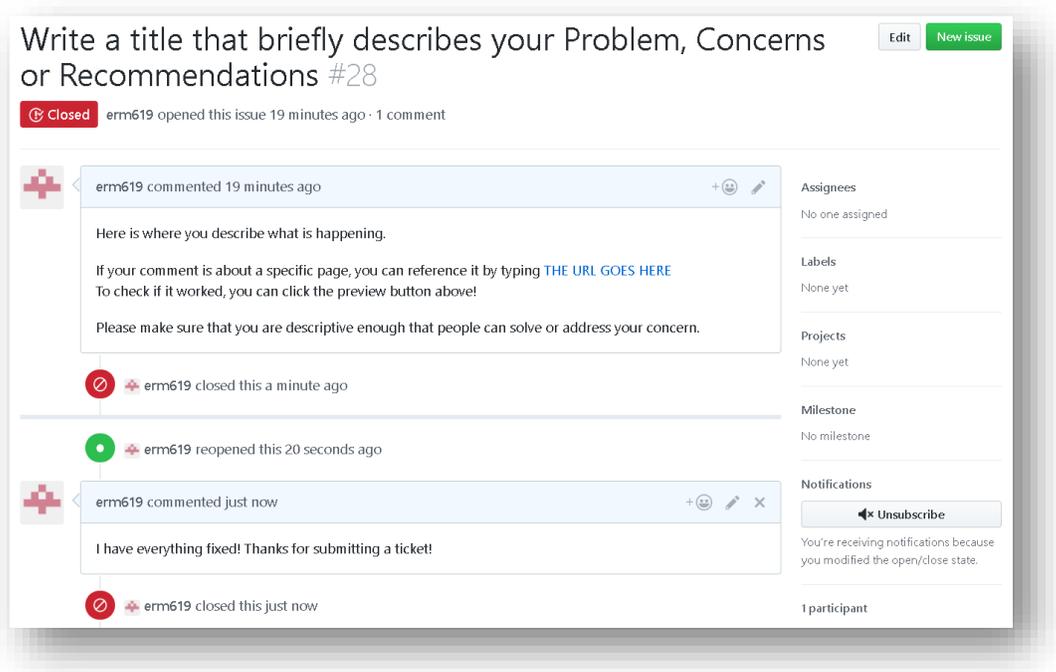

9. Once you have everything written down, click the green **“Submit New Issue”** button

10. If you realized you can add information, or want to change something after you submit a ticket, click the **“Edit Comment”** button

The screenshot shows a GitHub issue page for the repository 'cfms-website / cfms-website.github.io'. The issue title is 'Write a title that briefly describes your Problem, Concerns or Recommendations #28'. The issue status is 'Open', and it was opened by 'erm619' 15 minutes ago with 1 comment. The main content of the issue is the same text as in the previous screenshot. Below the issue content is a comment from 'erm619' that says 'erm619 commented 15 minutes ago'. To the right of the comment is a red box highlighting the 'Edit Comment' button (represented by a pencil icon).

11. Once we have commented or addressed your ticket, it will say “**Closed**”

12. You can find a closed ticket by going to <https://github.com/cfms-website/cfms-website.github.io/issues> and clicking on the “**Closed**” filter
