A DISCIPLINE BY DISCIPLINE BRIEFING
OF CARMS MATCH AND ELECTIVES DATA

2019

CFMS

Canadian Federation
of Medical Students

Introduction

In November of 2018, the Canadian Residency Matching Service (CaRMS) released data on Canadian medical graduate (CMG) electives dating back to 2013. This was an important step in increasing transparency into the Canadian residency matching process, which is often a source of stress for medical students.

To help demystify the residency match, the University of Toronto Medical Society, with support from the Canadian Federation of Medical Students (CFMS), has compiled publicly available statistics from CaRMS into a format that is more tailored towards medical students in particular. This resource is intended to help students easily interpret match and electives statistics for 30 direct entry medical disciplines.

We provide a one-page summary of match and electives statistics for each discipline. These statistics depict supply and demand of residency spots, outcomes of applicants applying to a given discipline, risks of going unmatched associated with each discipline, and the electives patterns of applicants who successfully matched to these disciplines. This is **not** intended to be used as the sole resource for choosing a specialty, nor as an algorithm for planning electives. Note also that this resource only contains information that is publicly available on the CaRMS website (<https://www.carms.ca/data-reports/r1-data-reports/>), and incorporates electives and match statistics from 2013 to 2019.

We hope that this resource will shed some light on patterns associated with CMG match rates and provide more focused information related to disciplines of interest.

All the best,

Andy Zeng

UofT MedSoc President 2018-19
MD/PhD Student, *University of Toronto*

Nishila Mehta

UofT MedSoc President 2019-20
MD/MSc Student, *University of Toronto*

Jason Kwan

Instructions on Interpreting Figures

A description of how to read each figure is provided below, using Internal Medicine as an example.

***Important Notes:** This document only depicts metrics from First Iteration of the match, and not Second Iteration. In this document, “unmatched” is defined as an applicant who does not match to any discipline after the first iteration of the residency match. “CMG” stands for Canadian Medical Graduate.

**** Reminder:** This is **not** intended to be used as the sole resource for choosing as specialty, nor as an algorithm for planning electives.

Internal Medicine	5-year Average	2-year Average
Applied as First Choice	422	440
Residency Seats	452	452
Competitiveness: Applied as First Choice / Seats	0.93	0.97
Applied as First Choice: Matched to Discipline	380 (90%)	380 (86%)
Applied as First Choice: Matched to Alternative	28 (7%)	43 (10%)
Applied as First Choice: Unmatched	14 (3%)	16 (4%)
Applied as Alternate Choice	422	449
Applied as Alternate Choice: Matched to Discipline	54	57
Percent w/ Parallel Applications (Ranked another Discipline)	60%	62%
Matched Applicants: Mean # of Electives in Discipline	2.6	3
Matched Applicants: Percent w/ on-site Program Electives	38%	47%
Ranked Applicants: Percent w/ on-site Program Electives	20%	24%

Table 1: Discipline Statistics

This table provides both 5-year and 2-year averages of match statistics for Internal Medicine.

All statistics are referring to the first iteration match.

This depicts the outcomes for applicants who ranked that discipline first on their CaRMS application, as well as some outcomes for applicants who ranked that discipline as an alternate choice.

Proportion with parallel applications refers to the proportion of first-choice applicants who also ranked other disciplines on their CaRMS application.

Competitiveness, Mean # of Electives in Discipline, and Percent with on-site Program Electives are explained on the next page.

Applied as First Choice: Match Outcome (2-year Average)

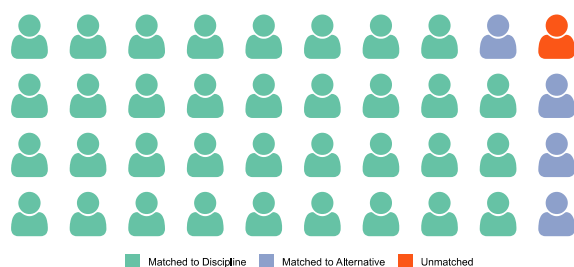

Figure 1: Match Outcomes

This figure depicts a 2-year average of the number of applicants who selected Internal Medicine as their top choice discipline and subsequently:

- Matched to that discipline (green)
- Matched to an alternative discipline (blue)
- Unmatched (red)

Each column represents 10% of applicants.

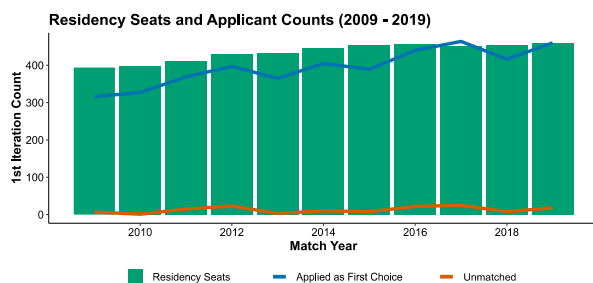

Figure 2: Seats and Applicants

This figure depicts the number of Internal seats (green bars) and first-choice applicants (blue line).

It also depicts the number of first-choice applicants to Internal Medicine who did not match to any residency position in first iteration (red line).

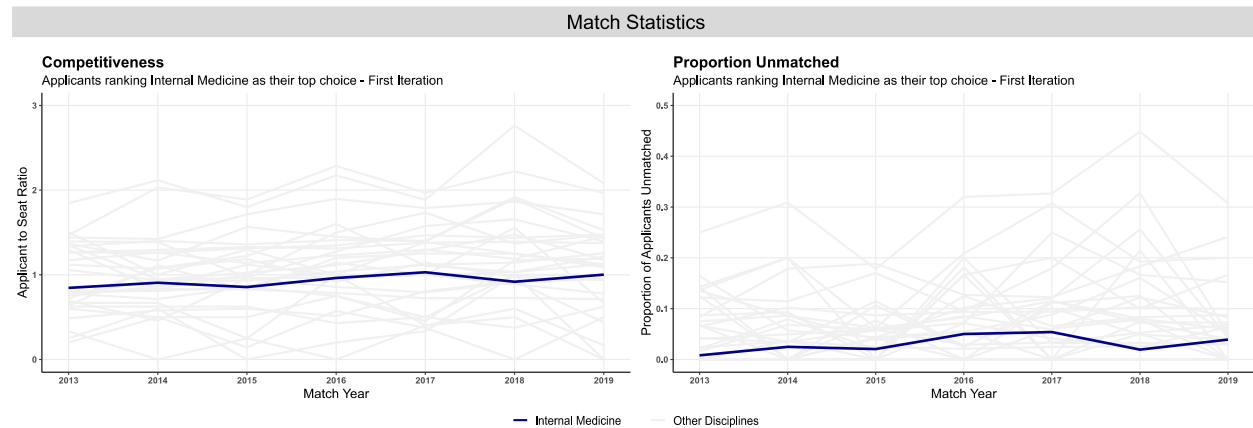

Figures 2-3: Match Statistics over Time

Competitiveness

This is the ratio between the number of applicants applying to this discipline as their top choice and the number of seats available in the first iteration of the match.

Proportion Unmatched

This is the proportion of applicants who ranked Internal Medicine as their top choice discipline and subsequently *did not match to any discipline* after the first iteration of the match.

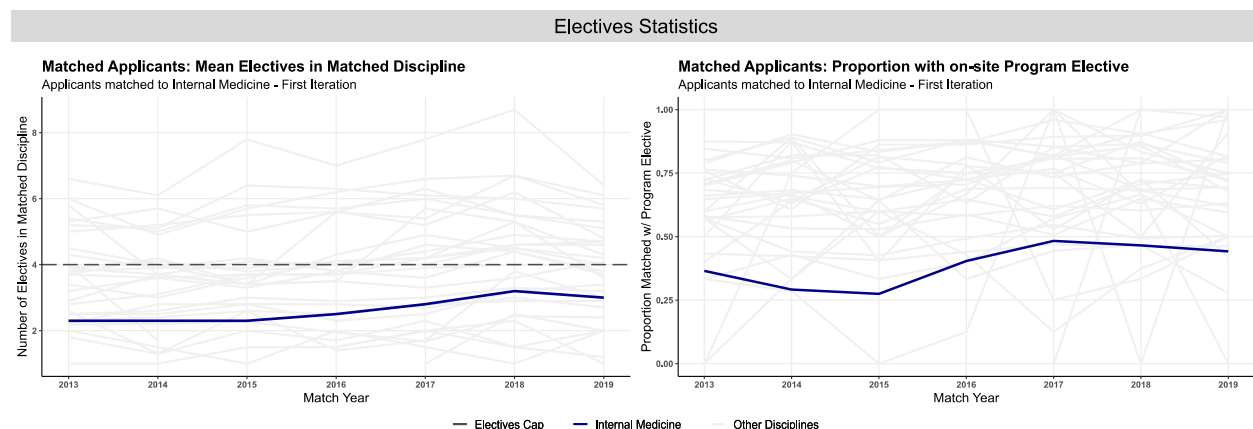

Figures 4-5: Electives Statistics over Time

Matched CMGs: Mean Electives in Matched Discipline

This is the average number of electives completed in Internal Medicine by applicants who successfully matched to that discipline. Note that this does not capture the number of weeks of electives that applicants completed, but rather the number of unique electives that these applicants reported on their CaRMS applications. Please be mindful of bias from self-reporting.

Matched CMGs: Proportion w/ on-site Program Elective

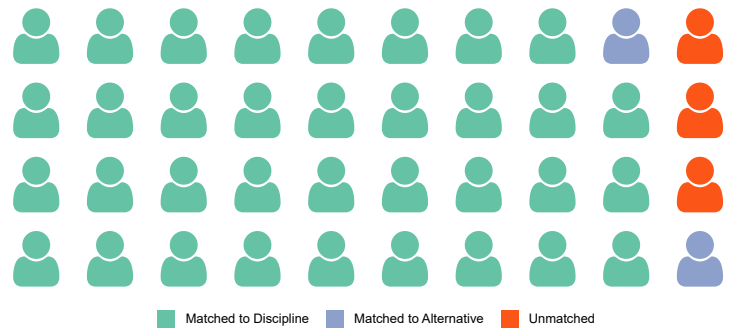

Of the applicants who matched to a program, this represents the proportion of those applicants who completed an on-site elective with the program they were ranked by. Note that this only captures whether an applicant was ranked at all, and not how highly they were ranked by the program. Nonetheless, we believe that this offers insight into program selection practices at a discipline-level and how completion of on-site program electives relates to successfully being ranked by a program.

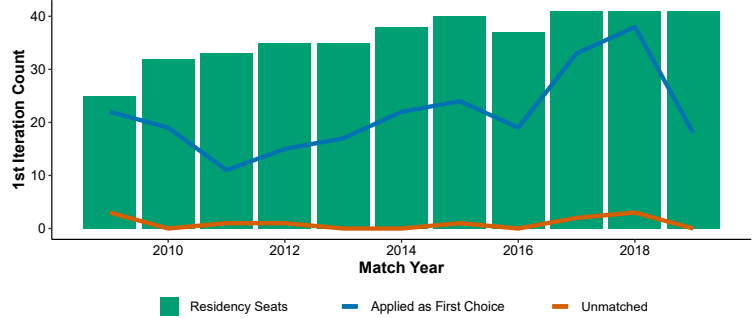

Anatomical Pathology

Anatomical Pathology	5-year Average	2-year Average
Applied as First Choice	27	35
Residency Seats	39	41
Competitiveness: Applied as First Choice / Seats	0.69	0.87
Applied as First Choice: Matched to Discipline	24 (90%)	31 (87%)
Applied as First Choice: Matched to Alternative	1 (5%)	2 (6%)
Applied as First Choice: Unmatched	1 (4%)	2 (7%)
Applied as Alternate Choice	25	26
Applied as Alternate Choice: Matched to Discipline	4	3
Percent w/ Parallel Applications (Ranked another Discipline)	79%	75%
Matched Applicants: Mean # of Electives in Discipline	2.6	2.8
Matched Applicants: Percent w/ on-site Program Electives	69%	62%
Ranked Applicants: Percent w/ on-site Program Electives	17%	12%
